183	Technology, Fabric & Size Guide

Dear valued customer,

In the last 135 years our brand is serving and protecting hardworking men and women across the globe. Hamilton Carhartt taught us to listen to our consumers, the ones in need of high-quality workwear items, and we never stopped listening.

With the rising of temperatures and the welcoming of a new season, we've got fresh, quality gear just for you. Carhartt is here to serve you with breathability, quality, and newness.

For Spring/Summer 2025, there will be a collection of new t-shirts, sweatshirts, trousers, and outerwear that will be your loyal companion, on and off the job. Among these exciting products, our new Force Sun Defender™ items will provide comfort and safety for your hardworking customers. The new TENCEL™ Lyocell tops for women further highlight how to enjoy lightweight, soft, breathable fabric without having to compromise on quality and comfort.

Together we're making it happen since 1889, thank you for being part of that journey.

Stay well, keep busy,
Albert Foppen
Vice President EMEA/PAC

		PL	Penetration resistance (4,5mm nail), cleated outsole
			Closed seat region

	FIBERGLASS TOE CAP (FT) Protects against impact hazards with a fiberglass toe, taking up to 200 joules of force and compression protection of 15000N. The lightest toe cap with an ergonomic shape specially designed to adapt to any type of foot, this will ensure comfort and a high precision fit.
	ALUMINIUM TOE CAP (ALU) Protects against impact hazards with a fiberglass toe, taking up to 200 joules of force and compression protection of 15000N. The lightest toe cap with an ergonomic shape specially designed to adapt to any type of foot, this will ensure comfort and a high precision fit.
	ANTI-STATIC PROTECTION (A) Footwear will reduce the excess static electricity by conducting the charge from the body to the ground. Avoids risk of spark ignition of flammable substances and vapours. Anti-static measured according to ISO20344:2021 the electrical resistance shall be for both conditions (wet & dry) above 100 kΩ and less than or equal to 1000 MΩ. Antistatic footwear will not provide protection against electric shock from AC or DC voltages.
	SLIP RESISTANT (SRC & SR) Carhartt safety footwear complies to EN ISO20347:2022, EN ISO 20345:2011, ISO20345:2022 & AS2210.3:2019 anti-slip standards, offering slip resistant footwear tested to EN ISO20344:2021
	SCUFF TOE CAP In compliance with the requirements of EN ISO 20344:2021, the scuff cap shall not develop any holes through the full thickness before 8000 cycles has been performed.
	WATER RESISTANT UPPER (WRU) In compliance with EN ISO20345:2011 & AS2210.3:2019. Upper has been treated with a substance to repel water to a certain level. Prolonged exposure to water will not keep your feet dry.
	WATER RESISTANT UPPER (WPA) In compliance with ISO 20347:2022, ISO 20345:2022 & AS2210.3:2019. Upper has been treated with a substance to repel water to a certain level. Prolonged exposure to water will not keep your feet dry.
	WATER PROOF (WR) Fully waterproof footwear in compliance with ISO 20345:2022 & AS2210.3:2019. Carhartt waterproof footwear also offers a Sportex waterproof lining to ensure full protection against all wet conditions.
	RESISTRANCE TO FUEL OIL (FO) Footwear tested by submerging sampel in Tri-methyl-pentane for 22 hours. Volume swelling and or shrinkage and hardness of outsole needs to be within standard.
	HEAT INSOLUTION OUT- & MIDSOLE (HI) Heat insulation of outsole complex tested accordance to ISO 20344:2021 with temperature of the hotplate at 150°C, the temperature rise on the upper surface of the insole or insock, after 30 min shall be 22°C or less, plus no serious damage to outsole.
	COLD INSULATION (CI) Cold insulation test of outsole tested in accordance to ISO20344:2021. Footwear offers Insulation against cold tested at -17°C, for 30 minutes and temperature decrease of the surface of the insock shall be less than 10°C.

	ENERGY ABSORPTION (E) Energy Absobtion under the heel offers minimum 20 joules energy absorption. Insock is removable with breathable carbon layer for absorption and anti-Odor properties. Safety testing and certification was carried out with the removable in sock in place. Footwear should only be use with certified compatible insock supplied by the original footwear manufacturer.
	HEAT RESISTANT OUTSOLE (HRO) Heat resistant of outsole tested to withstand 300°C for 60 seconds without showing cracking, melting or charring.
	STORM DEFENDER™ & WATERPROOF These shoes are designed with a waterproof lining to be completely waterproof and to keep your feet dry in most types of wet conditions. A Sportex waterproof and breathable membrane is used to keep you feet dry and warm while wicking moisture away from the foot and promoting air flow and circulation.
	RUGGED FLEX™ Gear meets Carhartt's defined standards for stretch and recovery to give you extra range of motion so you can move and work easily in Rugged Flex™ footwear. This can be found in the construction of the sole, composition of the materials used in the anti penetration textile plate and non metallic thermo plastic polymer shank. These elements provide protection and support whilst both being pliable enough to suit the wearers needs in the work place.
	ANTI-PENETRATION (P & PL) In accordance with ISO 20344:2021 no perforation shall occur ay any of the four measurements when 1000N is applied to the outsole with 4.5mm nail. The anti-penetration plate is made of compressed textile to enable flexibility while protecting the wearer from sharp objects piercing through the plate and causing injury to the foot.
	NON METALIC SHANK Lightweight non-metal performance shank for extra stability. The shank offers support lessening tention in the arches of your feet, calves and knees. It provides stability when walking over uneven terrain as well ask keeping your safety footwear in shape.
	VIBRAM Is the world leader in high performance soling systems. Combining cutting edge designs with advanced rubber compounds to deliver optimum performance. Our Vibram rubber outsoles engineered with a polyurethane midsole are built to withstand the pressures of a work environment, providing essential protection of anti-slip, heat resistance, durability against abrasion contact, including exposure to oil and ammonia.
	CORDURA™ FABRICS Offer excellent resistance to tears, scuffs, and abrasions, High performance CORDURA™ fabrics are used where durability counts – durability that lasts.
	YKK The YKK Fastening Products Group is a trusted worldwide brand for quality produced fasteners, including zippers.

**TECHNOLOGY,
FABRIC AND
SIZE GUIDES**

TECHNOLOGY REFERENCE

ICON		MARKETING DESCRIPTION	FABRIC DESCRIPTION
	Rain Defender™ Durable Water Repellent (DWR)	Amazingly durable and dependably water repellent, moisture beads up and rolls off. Rain Defender™ Durable Water Repellent.	Water Repellent finish that provides protection in light rain.
	Storm Defender™	Waterproof, breathable technology stops water from getting in but lets sweat out.	Membrane/laminate applied to the fabric to keep water from reaching the inside of the garment, but also allows sweat/heat to escape.
	Rugged Flex™	Gear made to move in, so whatever you're doing, it's easier to do. Rugged Flex™ stretch technology for ease of movement.	Carhartt's rugged stretch designation given to materials that will meet the defined standards for stretch and recovery.
	Wind Fighter™	The wind can whistle, you won't care. You're better protected than a franchise quarterback in a pre-season game. Wind Fighter™ technology tames the wind.	Finish or added membrane that keeps wind from going through the fabric and reaching your skin.
	Carhartt Force™	Wicks sweat and dries fast. Force technology stares down heat and keeps you cool.	Fabric must have Fast Dry™ wicking technology and may be combined with the following properties: - Fights odors - Rugged Flex™ stretch 
	RIPSTOP®	Carhartt's Cotton Ripstop® is built to stand up to tough days. The Ripstop® fabric is specially designed to resist rips and tears so it doesn't wear down quickly due to its better weave.	Carhartt Ripstop® fabrics are woven fabrics, using a reinforcing technique that makes them more resistant to tearing and ripping.
 FORCE SUN DEFENDER		Employees in need of protection against the harmful effects of sunlight UV can safely use UPF 40+ clothing. Of course, this should be combined with other measures such as using sunscreen on uncovered skin and wearing sunglasses with UV filtering.	Lightweight, UPF-rated 100% polyester jersey covers you up without weighing you down. It also fights sweat and odor to keep you feeling fresh and focused on the task at hand.
		Each piece in the new SuperDux™ line features Carhartt's Rugged Flex™, Rain Defender™ and Wind Fighter™ technology – making it built to stretch and move with you, and adding an extra layer of protection against outdoor elements. The gear also features the look of traditional Duck® with either a lighter nylon fabric (35% weight reduction) with 3M™ Thinsulate™ for warmth without added weight or a unique, nylon stretch shell laminated with a dense Sherpa to keep warm while offering a softer touch.	
		Full Swing® offers a patented design with stretch across the shoulders, added flexibility in the elbows, and arms that move freely without the jacket riding up. U.S. PAT. 10,143,249. PATS PEND.	Rugged Flex™ technology engineered design to provide improved range of motion. Engineered fit to remove bulk and weight.
		3M™ Thinsulate™ Type G Insulation is a workhorse insulation – warm, durable, versatile, yet lightweight. These insulations help trap and hold body heat, while still allowing for moisture to escape. The lofty profile enables versatile garment design with extra warmth and durability.	3M™Thinsulate™ Featherless insulation in an innovative material to replace down. A loose-fill insulation designed by scientists that mimics down when dry and is warmer than down when wet. Featherless insulation in an ideal synthetic alternative to down in any garment (add in heat rating with colours). <div><p>WARMTH SCALE</p><p>GRAM WEIGHT</p><p>Less than 60g 60g - 140g 141g +</p></div>

DISCLAIMER
Our aim is to serve and protect hardworking men. Every attempt has been made to ensure accuracy of the product descriptions/colours in this catalogue at the time of printing. NEW FORCE SUN DEFENDER™

SWEAT-FIGHTING SUN PROTECTION TOUGH ENOUGH FOR THE JOBSITE

FORCE SUN DEFENDER™

TENCEL™ branded lyocell fibers are lightweight, incredibly soft, and extra breathable, all without sacrificing any durability.

CORDURA®
Advanced Fabrics

CORDURA™ fabrics are both strong and versatile, protect against tears, scuffs, and abrasions. Great for combating the daily grind to surviving some of the world's toughest environments.

WHAT ARE CORDURA™ NYLON FABRICS?

Durable CORDURA™ NYLON fabrics keep you at work, protecting you from the wear-and-tear hazards of life on a job site, and Carhartt's gear equipped with CORDURA™ NYLON fabric is built to last. It is used in our Certified Footwear, and as reinforcement elements in kick pleats and utility bands of our Men's work pants. Our durable CORDURA™ NYLON jackets, like the Rain Defender™ Relaxed Fit Lightweight Insulated Jacket, come equipped with a CORDURA™ NYLON fabric shell that is lighter than most jackets, yet is resistant to tears, cuts or other abrasions. The variety of colors and looks in our CORDURA™ NYLON collection, gives you a full arsenal of options when tackling each new challenge of your workday. Experience and innovation matters, and we've been perfecting our line of work gear since 1889. You've come to the right place at Carhartt for gear that will last as long as your career. Because at Carhartt, we're here to help you move like you mean it.

TENCEL™ is a trademark of Lenzing AG

SHELL FABRIC

ALL OUR DUCKS, IN A ROW

Brown duck was the genius creation of Hamilton Carhartt. His brown duck bib overalls for railroad workers revolutionized clothing for the working class. These overalls were first recorded in a 1915 newspaper article that described the new “wonderful brown Carhartt’s.” This brown duck bib is still in the Carhartt stable and remains as popular as it was when originally introduced. Hamilton Carhartt’s brown duck serves as a reminder that great quality never goes out of fashion. Today, we’ve increased our duck line across the board for men’s, women’s and accessories and color, to the advanced technologies and finishes used to fortify the garment, there’s a hardworking duck fabric for every task.

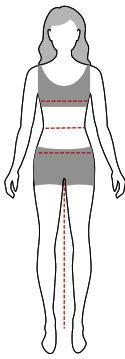

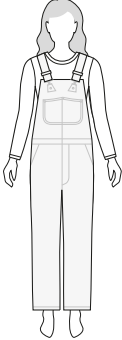

WHAT IS DUCK FABRIC?

Since the introduction of our original brown duck in 1915, Carhartt has developed 8 different variations of our famously durable workwear fabric — currently in use in over 200 rugged Carhartt products. With distinctive properties ranging from fabric strength, weight, rigidity, and color, to the advanced technologies and finishes used to fortify the garment, there’s a hardworking duck fabric for every task. Learn more about our different duck types below.

LEARN MORE ABOUT OUR DIFFERENT DUCK TYPES BELOW.

<p>FIRM DUCK</p> <p>Our strongest cotton duck is the most durable canvas out there. Built with added toughness, firm duck is water-repellent, wind resistant, and rugged. If you like to break in your jackets and pants, firm duck is for you.</p>	
<p>DUCK</p> <p>Good ‘ol duck is stiff, ring-spun cotton. If you like your Carhartt solid, classic and durable as the day is long, this is the duck for you.</p>	
<p>WASHED DUCK</p> <p>If you like sandstone duck, you’ll like our washed duck. This fabric feels exactly like it sounds — we took our durable, classic duck, and washed it for a broken-in look and feel. It breaks in faster than duck, and looks newer, longer. Find it in gear like our Full Swing®</p>	
<p>RUGGED FLEX™ DUCK</p> <p>Rugged Flex™ Duck gives you the classic Carhartt look, with just the perfect amount of stretch. Made by combining our famous cotton Duck with Rugged Flex™ durable stretch technology, the result is increased ease of movement everywhere it’s needed, and our most comfortable heavyweight gear yet.</p>	

CARHARTT WOMEN’S BODY MEASUREMENTS

HOW TO MEASURE	HEIGHT CHART
<div><p>Bust: Measure the fullest part of your bust, keeping the measuring tape parallel to the floor</p><p>Natural Waist: Bend side to side and find the natural bend in your body; this is your natural waist. Note: It may not be the smallest point.</p><p>Hips: Measure the fullest part of your hips, approximately 8" below the natural waist.</p><p>Inseam: Measure from your crotch down to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. To get the inseam length, measure on the front from the crotch point, along the seam, to the hem.</p><p>For best results, measure over your undergarments.</p></div>	<div><p>REGULAR 5'4-5'8 inch / 162-172 cm inseam: 29-31 inch / 73-79 cm</p></div>
