Packing List

- 1 X Receiver(includes 1 X Nylon Collar)
- 1 X USB Charging Cable
- 1 X Test Bulb
- 1 x User Manual

ON-OFF

Press the Power Button once to turn on, press the Power Button for 3 seconds again to turn off

Using method

- * Once you receive the collar please test it firstly. (testing way as below)
- * **After testing please configure the suitable mode for your dogs follow the instructions and your actual situation! (instructed picture as below)**
- * We suggest not using shock model at first, choosing beep and vibration mode to let your dog adapt to it. If these are not valid for it you can use the shock mode, and please set level 1 in the beginning and then increase gradually according your Need.

Friendly Reminder

- * **Keeping one finger distance between the neck and the collar to avoid being triggered by the shaking/moving/running etc.**
- * Do not wear longer than 12 hours per day. If it is possible, reposition the collar every 1 to 2 hours .
- * Take the barking collar off before swimming, it is rainproof, not waterproof.
- * Please take off your iron collar, before you put the bark collar on.
- * Clean the contacted area between the collar and the neck weekly with a damp cloth
- * Examine the contacted area between the collar and the neck daily to avoid rash or sore

Product working principle

This product uses the vibration sensor for sensitivity distinction, when the dog barks, it will trigger the sensors thus triggering the product. The collar will beep then the vibration and last the shock (depending the setting).

Auto-Protection Mode

If the collar keep activates for 7 times in one minute, it will enter auto-protection mode, the display will flash "E", one minute later the product will enter the work mode.

When in automatic protection mode, press any button will make the product re-enter the work mode

Chargeable collar

Gently press the power button, you can know how much the power it is.

1 hour of charge time gives you 14-20 days of using.

When charging the product, the digital tube will display the power and continue to flash.

When the product is fully charged, the digital tube will display "7".

Rechargeable Battery (280mAh)

Adapter is not include

Adapter Current is less than 1A

Testing

1. Turn on the power
2. Set the sensitivity to 5-7 grade and the shock greater than 0 grade
3. Wear the tester on the conductive silicone prongs behind collar
4. Please send a short voice like “wow” (as short as possible) to sensors. Since the frequency of human voice is different from that of dogs, please test more time.

Frequently Asked Questions

Q: Which part of the dog's body can put the receiver?

A: Below the throat.

Q: Why the product just bought back but can not work?

A: First confirm that the product is powered, then turn on the power and adjust the product sensitivity to 7 grade

Tips

- You should choose these functions according to the size of your dogs.
- Refer to the Dog Size Reference Chart for a detailed guideline on which sensitivity grade is best suited for your dog.
- You can place the collar on your dogs without powering the device on to allow them to adapt to the collar.
- Tips for how to choose optimal sensitivity for your dogs:

The size of dog	Small	Medium	Large	Huge
Sensitivity grade	5-7	4-6	2-5	2-5

- **You can adjust the sensitivity from the highest sensitivity gear 7. If your dog is accustomed to the sensitivity levels, you can lower the sensitivity grade.**
- **You are recommended to use sound function first (The sound is default setting), then choosing the vibration function or static shock function according to how your dog responds to the collar.**
- **You are recommended to use the static shock function from the weakest grade 1.**
- Tips for how to choose optimal vibration function or static shock function for your dogs. (The sound is default setting)

The size of dog	Small	Medium	Large	Huge
Vibration grade	1-2	1-2	3-4	5-7
Static shock grade	0-1	1-2	3-4	3-5
