Safety Instructions

1	This product cannot be tested directly on humans, otherwise it will violate local laws.	
2	Turn off or remove the Bark Control Collar before playing with the dog.	
3	Please do not wear the device on your dog for a long time.	
4	Do not place the product near a stove or at high temperatures.	
5	Do not open the shell of the product which will cause the lithium battery to disconnect or start a fire.	

Product Parameters

Product Name : Bark Control Collar
Product Model: B630 Plus
Operating Voltage : 3.7V
Battery Capacity : 450mAh
Rated Input: DC 5V /0.5A
Waterproof rating : IP67
Operating temperature: -10°C~+50°C
Storage temperature: -20°C~+60°C
Device volume: 67.4mm*40mm*33mm
Net weight : 56 g

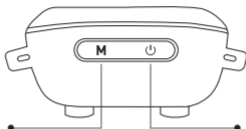

What You Get

COMPONENTS

	Bark control collar	1
	Type-C charging cable	1
	Static stimulation test light	1
	Contact points	2 pairs
	User manual	1

Function and Operation Description

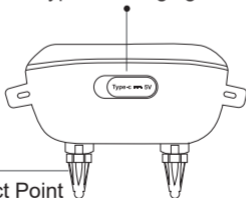

1. At a glance

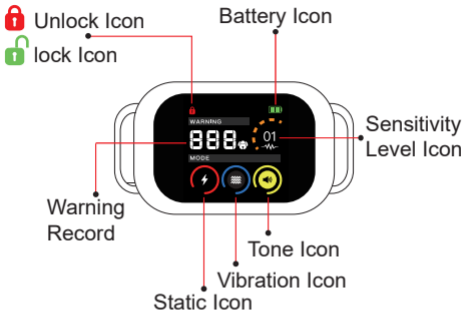

② Mode Button

① Power Button/Sensitivity Adjustment Button

③ Type-C Charging Port

④ Contact Point

Icons	Meaning	Status
	Battery Fully Charged Icon	This icon that signifies a fully charged battery
	Low Battery Icon	This icon indicates low battery
	Unlock Icon	The operation interface is locked

Icons	Meaning	Status
	Lock Icon	The operation interface is unlocked
	Tone function on going	Indicates the product is currently in sound mode
	Vibration function on going	Indicates the product is currently in vibration mode
	Static stimulation function on going	Indicates the product is currently in static mode
	Sensitivity Level Icon	Used to display the current sensitivity level
	Warning Record	When this icon lights up on the screen, it signifies the activation of protective mode

2.Charging

Tips: Please fully charge before use!

 The battery is low

 The battery is fully charged

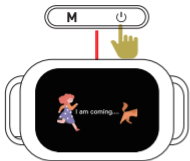

Display Charging Status and Prompt Successful Charging Connection.

3.Installation

- ① Install the contact points
- ② Static test light
- ③ Use the test light to tighten the contact points

4. Turn on/off

Press and hold the power button for 2 seconds to turn on. The screen will display "I am coming / Bark Control Collar."

Press and hold the power button for 2 seconds to turn off. The screen will display "Waiting for you." The screen will then go dark.

Screen off: The screen will go off if no operation occurs within 30 s. You may press any button to light the screen up.

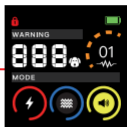

Without any action, the device will return to the main menu after 5 seconds.

5. Operating instructions

① Locking and Unlocking:

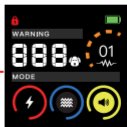

Lock: Press and hold the power button and the M button simultaneously. The screen will display the lock icon, and after 2 seconds, the device will be locked.

Unlock: Press and hold the power button and the M button simultaneously. The screen will display the unlock icon, and after 2 seconds, the device will be unlocked.

② Tone Mode

The levels range from 1 to 6, with higher levels resulting in faster sound production.

③ Vibration Mode

The levels range from 1 to 6, exclusively offering vibration. The intensity of the vibrations increases with higher levels.

④ Sound + Vibration Mode

The levels range from 1 to 6, with increasing levels indicating more intense vibrations and heightened auditory alerts.

⑤ Vibration + Static Stimulation Mode

The levels range from 1 to 6, with higher levels progressively increasing the intensity of vibration and transitioning from weak to strong static warning, while maintaining a consistent duration.

⑥ Sound + Vibration + Static Stimulation Mode

The sound, vibration, and static are synchronized with 6 available levels. As the level increases, the intensity of the shock also increases accordingly (The default setting is vibration +static stimulation mode).

⑦ Sensitivity Adjustment

After power on, press the power button once to adjust sensitivity.

Level 1-3 is suitable for environments with background noise, such as music or TV playing. Level 2-4 is suitable for typical home environments. Level 5 is ideal for extremely quiet situations, such as late at night (may be easily triggered).

⑧ Trigger Settings

The product is set to default Progressive Mode, adjusting levels based on the duration of dog barking intervals.

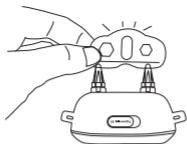

For example, if at Level 1 warning, continuous barking raises the warning level by one step. If the dog remains silent for a period and then barks again, the warning level decreases by one step.

⑨ Warning Count Record:

The product records a warning count every time it is triggered, starting at 001 and going up to a maximum of 999. To clear the warning count, press and hold the M button for 3 seconds.

6.How to test the Static Stimulation function?

Turn on the bark collar and switch to Vibration + Static Stimulation Mode. Put the static test light on the contact points, then shout "woof, woof" to the collar while shaking it. Normally, the test lamp will flash when triggered.

7. Training instructions

1. Initial 1-7 Days of Wear:

During the first week of your dog wearing the product, please remain nearby and attentive. In general, the bark control collar might cause some disruption to your dog's barking behavior. Initially, your dog might struggle to adapt, leading to more intense barking or manifestations of nervousness, attempts to escape, and similar behaviors. At this stage, it's important to console your dog, help them relax, and gradually make them realize that when they become calm, the collar's warnings will subside.

2.Days 8-15 of Wear:

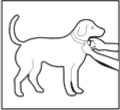

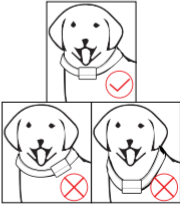

During this phase, it's important to note that your dog is likely barking less randomly. However, the training is not yet complete. Whenever you want your dog to remain calm, continue using the bark control collar. When your dog behaves well, consider rewarding them with treats. If the collar is not worn consistently during this stage, your dog may revert to barking, which could impact the training progress.

8.Level chart

Modes/Levels	level 1	level 2	level 3	level 4	level 5	level 6
Sound	Gentle-----Urgent					
Vibration	Weak-----Strong					
Sound + Vibration	Weak-----Strong					
Vibration + Static stimulation	Weak-----Strong					
Sound + Vibration + Static stimulation	Weak-----Strong					

Wearing Methods and Precautions

1. Wearing methods

①	<p>Please keep the dog in a comfortable standing position and ensure that the device is turned off before wearing.</p>	
②	<p>Please place the device in the middle of the dog's neck and ensure that the direction of the switch button is upward, and the contact point is aligned with the dog's throat. Check the tightness of the device collar.</p>	

③

You should be able to easily insert a finger between the collar and your dog's neck. If the collar is too loose or too tight, the operation of the device will be affected.

④

Mark the desired length of the collar with a pen, remove the collar and cut off the excess. Then carefully singe the cut edges with a lighter to stop the collar from unraveling.

2.Wearing precautions

- Wearing a collar for an extended period of time, or being too tight, will cause the dog's skin to become irritated. This must be avoided.
- Please make sure your dog doesn't wear the collar more than 12 hours a day.
- Please try to readjust the collar position on the pet's neck every 1 to 2 hours.
- Regularly check the tightness of the collar to prevent excessive pressure.
- Do not connect a leash to this collar because it will cause excessive pressure on the device.
- Please clean your pet's neck area and the contact area of the device with a damp cloth every week.
- Please check the contact area daily for signs of rash or pain.

- Please stop using the collar until the skin heals if you notice a rash or pain in your dog. If the condition persists for more than 48 hours, seek medical attention immediately.

Frequently Asked Questions

Question	Problem	Action
1. Bark control collar cannot be charged	Charging cable does not fit	Use the charging cable that came with the device (5v 1 amp)
	Charging cable is damaged	Replace the charging cable and try again
	The product enters the low power protection mode	The battery needs to be charged. Please attach the charging cable and fully charge the battery
	Adapter doesn't fit	Use the charging cable that came with the device (5v 1 amp)

Question	Problem	Action
<p>2.The product does not turn on</p>	<p>Check whether the touch of the key is normal</p>	<p>No response means damaged</p>
	<p>No display/ sound prompt</p>	<p>Recharge again</p>
	<p>The product enters the low power protection mode</p>	<p>Connect charging cable and wait for the battery to charge</p>
	<p>Wrong startup method</p>	<p>Long press the on/off button</p>
<p>3. It is effective at first, but does not work later</p>	<p>① Check whether the device works normally</p> <p>② Wearing for a long time dog has been fully adapted</p>	<p>① Change the levels and readjust the training mode</p> <p>② It is recommended not to wear the product when not training</p>

Question	Problem	Action
