GREETINGS,

thank you for buying the Angles shoes. All the models are hand made in the Czech city Zlin and they are only made from EU materials. Each pair of shoes is made by more than 10 shoemakers, which makes each pair an original.

CARE INSTRUCTIONS

Use appropriate impregnation before the first use. Use your shoes when they are dry only. If they get wet, make sure you let them dry well first before using them again. Always untie or unzip the shoes before you put them on. Use shoehorn for easier manipulation.

Soft leather

Get rid of the impurities by using a brush or a soft wet cloth. After the thorough cleaning use appropriate nourishment for your shoes. We recommend Renapur, an universal natural balsam for soft leather, which dries quickly and does not leave any fatty feeling. Balsam protects the leather, impregnates and returns its brightness. Then you can also use the impregnation Collonil Carbon Pro, which effectively protects shoes from moistness and dirt. Apply the impregnation from 30 cm distance. One layer is enough.

Textile

Get rid of the impurities by using a brush or a soft wet cloth. If that is not enough, use cleaning foam for textile shoes. Then use impregnation. We recommend Collonil Carbon Pro impregnation, which effectively protects shoes from moistness and dirt. Apply the impregnation from 30 cm distance. One layer is enough.
