

Automatic Foot Washing Device

Package includes:

- 1 x Pet Feet Washing Cup
- 1 x USB Charger

This is the world's first automatic dog paws washer ,To different from the others, it rotates to drive the super soft silicone bristles so as to clean up fast and comfortably the dog's paws and easily solve the problem of dog paws cleaning.

Instructions:

1. Pour proper amount of clean water into the paw washing device
2. Press the switch, hold the paw cup with one hand, and place the pet paws into the paw washing device with the other hand, one paw can be cleaned in 1-2 minutes. Remove the paws and dry them with a towel.
3. After the cleaning, pour the dirty water into the sewer and wash the silicone brush directly at the faucet. (The whole machine is prohibited from being put into the water).

Attentions:

If the rotation is slow when using it, please pull the paw washing device up and down to relieve the motor resistance. The excessive resistance will cause shutdown when using it, this is a protective measure, press the button again to use it normally. Slow or no rotation after starting up indicates that the battery power is not enough, please charge it.

Advantages:

- EASY AUTOMATIC DEEP CLEANING, simple operation, there is no need for the master to hold the old-fashioned paw cleaning cup and set them on the dog's paws to constantly rotate, which makes the master tired and sweating.
- STRONG POWER: High-quality copper variable speed motor that has a rotate speed of 200RPM for effective deep cleaning.
- PREMIUM SILICONE BRUSH, Super soft and comfortable, can effectively absorb dust and dirt, protects and massages the small paws.
- USB RECHARGEABLE, 4h working time and 3h charging time per charge.
