

Vibration Anti-Bark Collar User Manual

Model Number: PD 258-V

Please read this entire guide before using!

Main Features:

- 1) PD258-V is a very safe product.
- 2) It has cycle charging, energy-saving functions.
- 3) It won't be disturbed by any other noisy.
- 4) It's suitable for the most popular dog breeds.

Turn On/Off:

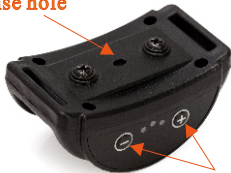

Start it by just pressing the switch, and shut it down by pressing one second.

Sensitivity Adjusting:

- 1) You can adjust the correct sensitivity according to the loudness of dogs' barking.
- 2) It's easy to adjust the sensitivity with 5 levels, the initial setting is level 3. Press “+/- ”to adjust the sensitivity with a “bleep”, the higher sensitivity, the easier to activate the collar to work.

Sense hole

Sensitivity Adjustable

Vibration Test:

The anti-bark collar will start vibration if you blow directly to the sense hole in the middle or imitate barking loudly.

Training Instructions:

- 1) As soon as the dog barks, anti-bark collar will start vibration to warn the dog to stop.
- 2) If the dog continues to bark, the collar will continuously vibrate for longer time after each bark till the dog stop barking.
- 3) After training, the dog will learn the vibration is caused by the bark.
- 4) It does need certain period of time to see the good result of this anti-bark collar.

Automatic Intelligence Mode:

- 1) After the dog stops barking for 30 seconds, anti-bark collar will reset to initial standby model, no matter how many times it works.

2) After the collar works for 7 times, the signal lamp will twinkle fast, and then the collar will stop working for 30 seconds before resetting to initial standby model.

The vibration technology is not only humane, but also very safe and effective.

Charging Information:

1) The product is with cycle charging function, the red light will twinkle when charging, and stay red without twinkle when charging full.

2) When battery is too low, the collar will shut down automatically, please charge in time.

Attention:

Please use USB charger with follow parameters (The product is also compatible with mobile chargers or computer USB interface, please double check the parameters before charging)

Input: 100-240V~50/60HZ

Output: 5V 1000mA(or 300mA/500mA)

Collar:

1) Please cut it if the stripe is too long.

2) Please don't tie the leash to the stripe.

3) Please put the collar below the dog neck with a finger space, if too loose, the vibration effect will be severely reduced.

Safety Notes:

- 1) Please avoid the dog biting of the collar, which is made by indigestible plastic and electronic components. If dog swallows any parts accidentally , please consult the local vet immediately.
- 2) The product is for dogs only, please put it away from kids.

Reminders:

- 1) Please keep the product away from water.
- 2) Very few dogs will still bark at the beginning of wearing the collar, and according to our years' experience, this behavior is normal and it only needs some time of training.
- 3) Usually the dog will reduce barking evidently after the first few days of wearing the collar, but the training isn't finished, and smart dogs will still attempt to bark. So we need to continue the training to keep the good result.
- 4) Although the anti-bark collar is designed with the latest technology of differentiating the dog's barking from other environmental noises, it might be seldom activated by dog's excessive scratching or outer fierce crash. Then the pet might be suffering from fleas or ear mites, please consult a local vet immediately.
- 5) If any other questions, you are welcome to contact us or our distributors.

Please install nylon collar in accordance with the illustrated figure.

Too long Receiver Collar can be trimmed, or be handled with other methods.

The device has been approved for use in EU countries and is therefore provided with the **CE mark**. All necessary documentation is available on the website: www.electric-collars.com
